COGNITIVE BEHAVIORAL THERAPY (CBT) SKILLS FOR ADHD*

Being a college student in today’s world can be challenging. If you’re also managing attention-deficit hyperactivity disorder (ADHD) symptoms, it can be even more difficult!

This group was developed using the structure of CBT to address the challenges that college students diagnosed with ADHD experience. As a group, we’ll work to develop skills and address behaviors related to inattention, forgetfulness, trouble sustaining attention, fidgeting, interrupting others, difficulties with organization and time management.

The group is open to undergraduate and graduate students who have been diagnosed with ADHD.

Jimmy Bruce, PhD, and Chasma Mathis, Psy.D., LP will co-facilitate the group.

This group begins September 16.
